## CONSERVATION SECURITY PROGRAM

Pennsylvania

Monocacy River Watershed

### GREEN FROG SELF-ASSESSMENT QUESTIONNAIRE

This questionnaire provides a way of rating your property for the important wildlife species for this watershed. Green Frog represents a group of wetland wildlife that are in decline. These species have declined primarily because of a lack of non-forested wetland habitat.

These questions help determine if the land you wish to enroll in the Conservation Security Program (CSP) meets quality criteria for a wildlife Resource Management System (RMS). Please read and answer each question by checking Yes or No.

	<u>Yes</u>	<u>No</u>
1. Is at least two percent (for example, two acres per 100 acres) of the land you are offering to enroll wetlands, swamps or marshes? These wetlands, swamps, or marshes must be within or adjacent to the offered land.	___	___
2. Are the wet areas in Question No.1 less than 50 percent trees and shrubs?	___	___
3. Do the wet areas in Question No.1 have standing water for at least a few weeks in the Spring and Fall?	___	___
4. Is the standing water in Question No.3 "ponded water" (not a stream)?	___	___
5. Is all of the standing water in Question No. 3 always less than one foot deep?	___	___
